

KENDRA LIDDELL

AI PRODUCT DESIGNER | PRODUCT BUILDER

Jackson, MS | Open to Remote | kendra.avery14@gmail.com | [linkedin.com/in/kendra-avery-741701187](https://www.linkedin.com/in/kendra-avery-741701187) | github.com/kenlora-7796

PROFILE

AI Product Designer and product builder who translates complex workflows into clear, usable AI-powered products. Experience spans product strategy, UI/UX design, user flows, design systems, AI workflow design, prompt engineering, AI-output evaluation, and AI-assisted software development. Builds working product experiences with Next.js, React, TypeScript, REST APIs, Git/GitHub, ChatGPT, and Claude.

CORE SKILLS

AI Product Design • UI/UX Design • Product Strategy • User Flows • Wireframing • Prototyping • Design Systems • Responsive Design • AI Workflows • Prompt Engineering • AI Output Evaluation • Usability Testing • Next.js • React • TypeScript • REST APIs • Git/GitHub • Technical Documentation

SELECTED AI PRODUCTS

Axiom | Agentic Software Engineering Workspace

Designed and built an AI software-engineering workspace centered on repository intelligence, contextual AI, prompt management, human approval, and developer workflows. Shaped product architecture, onboarding, dashboard experience, repository analysis, and the Prompt Library.

CreditResolve AI | Guided Credit Dispute Workflow

Designed and built a structured consumer workflow spanning report review, account and inquiry review, dispute case building, consumer certifications, letter preview, package creation, and case completion. Used guided product states instead of relying on a generic chat experience.

LoraOS | AI Operations Platform for Owner-Operators

Designed and built an AI-assisted trucking operations workspace connecting route intelligence, profitability, break-even analysis, load history, saved analysis, fuel and expense workflows, and responsive dashboards. Advanced the product to closed alpha.

EXPERIENCE

UI/UX Designer | FloBrain

- Designed AI-first interfaces, wireframes, user flows, and interface concepts for AI-powered applications.
- Collaborated with frontend, backend, and AI engineering stakeholders to refine usability, navigation, accessibility, and product quality.
- Used iterative design and AI-assisted workflows to evaluate and improve interfaces and product experiences.

Independent AI Product Developer

- Turned business problems and user workflows into functional AI products, feature requirements, interface systems, and documented product flows.
- Used AI-assisted development to build, test, debug, and refine applications while maintaining human review of product and UX decisions.

Business Funding Consultant | ROK Financial

- Gathered business-owner needs, managed CRM documentation and follow-up, and recommended financing solutions using a consultative approach.

Medical Laboratory Scientist

- Applied analytical thinking, quality assurance, regulated documentation, data accuracy, and cross-functional collaboration in healthcare workflows.

EDUCATION

Bachelor of Science in Medical Laboratory Sciences
